Zebra Projects Inc.

Zebra Project Inc's core business is to integrate, install and support existing software products and develop high quality software where our customers require custom solutions. Our aim is to always exceed our customer's expectations and create long term business relationships based on mutual respect and ethical business practices.

We have expertise with various technologies and problem spaces including Insurance, Health Care, Defence, Mining SCADA, Oil & Gas SCADA, Home Security, Government Services and Energy Marketing.

We have filled various roles over the more than 20 years of experience in the software development life cycle — business analyst, solution architect, application architect, software developer, project manager, performance analyst and service manager.

Our real passion is the design and development of software in the following areas:

Embedded Development
Development of Real-Time Communications Software
Development of Multithreaded Client/Server Applications
SCADA Protocols
